## Science & Religion

Science typically means study of matter and all that is made of matter, right from the sub-atomic particles to the heavenly bodies. It is observed that science is logical and rational. It is reproducible that a scientific theory developed by one scientist in one part of the world can be proven by another scientist in another part of the world. This gives rise to a near-universal acceptance of science. There may be different schools of thought while a particular scientific theory is in its developmental stage. But, as it progresses to greater maturity, it gains universal acceptance as well. We have also noticed that certain scientific theories had to be modified over a length of time. For example, Newtonian laws of mechanics did not work well in certain circumstances, and this gave rise to the theory of relativity and quantum mechanics. Thus, science keeps on progressing based on our current understanding of the behavior of matter though the scientists are humble enough to admit that they never have the final word.

## Arya Samaj Houston held the Essay Competition 2006-2007

Acharya ji, thanks for planning & holding the Essay & Shloka competition. It is exciting to watch how these children recite Shlokas & then explain their meanings. These children are going to remember these Shlokas rest of their life. Essays by children give us clear indication that all our hard work & efforts for the DAV Sanskriti School are paying off well. Thanks to you & all your team members. I enjoyed yesterday's parents teachers meeting. I could see how most of the parents are appreciative of our efforts. I would like you & the rest of the Curriculum Team to devote maximum time to finalize curriculum before the next Maha Sammelan so that we could distribute to the other Samajs.

Regards, Dev

**Atul Gupta:** "There are many ways in which the lessons taught to me in Arya Samaj dictate my act. It is in making these choices that the lessons I have learned from Arya Samaj come into use. Arya Samaj has taught me to do what's right despite what others think, say or do. It also teaches me to honor my culture and not be ashamed therefore.....I use these lessons every day and they have truly enriched my life."

**Eesha Dhavan:** "I have been going to DAV Sanskriti School for one year and I have learned a lot of nice things. The most important thing I have learned is to respect my parents.....Some times it is hard but still you should be honest."

## Pictures from the Essay Competition:

**Dr. Usha Shastri's** discourses on *Vedas and Upanishads* draw large audiences in India and abroad. Fluent in seven languages, she is a powerful speaker with a divine voice to chant and sing the Vedic hymns and Bhajans. Retired after teaching at the Universities of Delhi and Haryana for 29 years, she is now devoting her life to spread the message of the *Vedas and Upanishads*. She has written several books on the Vedas and has been honored with many awards, including Ved Vidushi, Bharat Mata ki Suputri, Vedas Ushas, Arya Meera, and many overseas awards.

■ [Greater Dallas Arya Samaj](#) announces new website:

<http://www.aryasamajdallas.org>

Our new site provides easy access to information on the activities and services of the Greater Dallas Arya Samaj. We hope this site is useful. For comments on website please post in the feedback forum or send an email to [arya\\_samaj@swbell.net](mailto:arya_samaj@swbell.net).

■ **Wishing you all a Very Happy 2064 Hindu New Year.**
